DAY X: If war breaks out...

STOP THE WORLD TO STOP THE WAR

George Bush and Tony Blair are determined to start a full-scale war on Iraq. Health organisations estimate that between fifty and one hundred thousand Iraqis will die if the war goes ahead.

The UN estimates that ten million Iraqis will be put be at risk from homelessness and disease.

The US claims this will be a war of liberation to rid the world of Saddam Hussein and weapons of mass destruction.

This is nonsense. The West armed Saddam Hussein in the first place. They still sell arms and give support to tyrants and dictators across the world today. In reality the US and its allies are planning to murder and terrorise innocent Iraqi civilians in a bloody war for oil.

A war on Iraq will also cause huge instability across the Middle East and encourage more conflict and violence in the world

If war does go ahead the Irish government will have blood on their hands. By allowing the US military to use Shannon en route to the Gulf they have directly involved this country in war. They have done this even though the majority of people in this country are opposed to war and any Irish involvement in it.

On February 15th tens of millions took to the streets against war around the world and over 150,000 marched in Dublin.

These protests have shocked the establishment and delayed the start of the war. But Bush is still determined to attack. With or without UN support we must oppose this unjust war if it starts. We must demand our government end the use of Shannon by the US military.

On Day X (The Day War Breaks Out) we must STOP THE WORLD TO STOP WAR.
